```

```
[3]: str
```

[Click here for the solution](#)

```
type("1.1")
```

Is a Number Always a Number?

Cast the following to an int and then to a bool:

```
[5]: bool("1")
```

```
[5]: True
```

[Click here for the solution](#)

```
print(int("1"))  
print(bool("1"))
```

OR

```
print(bool(int("1")))
```
